“The important thing is not to stop questioning. Curiosity has its own reason for existing”

Summary

Current Computer Science student at the University of Waterloo. Experienced in object-oriented programming. Have competed in dozens of online competitive programming competitions and have solved hundreds of problems focusing on algorithms and data structures (using C++). Working knowledge of web development (HTML, CSS, Javascript, jQuery, Node.js, MongoDB) from online bootcamp. Quick learner, passionate about programming and am always looking forward to picking up new skills or sharpening up old ones.

Projects

Just Type- github.com/pwnclub/just-type

BUILT WITH TKINTER AND MATPLOTLIB USING PYTHON 3

Aug. 2017

- offline, minimalist typing speed test application
- live WPM (words per minute) or CPM (characters per minute) display and graph
- leaderboard, randomly generated tests, test using custom input, graphs showing progress over time

Kinect 4- github.com/pwnclub/kinect-4

BACKEND BUILT WITH PYTHON 3, FRONTEND WITH JAVASCRIPT, HTML/CSS

Nov. 2017

- web game that consists of playing Connect 4 against an AI using hand motion controls
- project made in a group of four at Hack Western 4
- worked on some of the backend, used the Leap Motion API to turn movements into instructions, designed all art assets
