“The important thing is not to stop questioning. Curiosity has its own reason for existing.”

Summary

- Experienced in object-oriented programming
- Competed in dozens of online competitive programming competitions and have solved hundreds of problems focusing on algorithms and data structures (using C++)
- Working knowledge of web development (HTML, CSS, Javascript, jQuery, Node.js, MongoDB) from online bootcamp
- Quick learner, passionate, always looking forward to picking up new skills or sharpening up old ones

Projects

Just Type- github.com/pwnclub/just-type

BUILT WITH TKINTER AND MATPLOTLIB USING PYTHON 3

Aug. 2017

- Offline, minimalist typing speed test application
- Live WPM (words per minute) or CPM (characters per minute) display and graph
- Leaderboard, randomly generated tests, test using custom input, graphs showing progress over time

Doctor DMs- github.com/pwnclub/phone-doctor

BACKEND BUILT WITH STDLIB, FRONTEND WITH VUE.JS

Nov. 2017

- Project made in a group of four at DelatHacks IV, Winner of the Stdlib API prize and Top 6 Finalist
- Text a number symptoms/age/sex to get formatted medical information from the Apimedic API in both text form and as a link to a detailed Vue.js site
- Worked primarily on the frontend (Vue.js app)
