"The important thing is not to stop questioning. Curiosity has its own reason for existing."

Summary

Current first-year Computer Science student at the University of Waterloo. Experience in object-oriented programming. Have competeted in dozens of online algorithmic competitions and have solved hundreds of problems (using C++). Working knowledge of web development (HTML, CSS, Javascript, jQuery, Node.js, MongoDB). Passionate about programming and always looking forward to picking up new skills or sharpening up old ones.

Honors & Awards
